

Creepy Crawly Alphabet  
Dr. Hildegard Kuse  
Dr. Loretta Kuse

A is for an ant.

B is for a buzzing bee on blossoms bright.

C is for a Cecropia caterpillar creating a cocoon.

D is for a delicate Damselfly.

E is for eggs that insects lay. Each and every insect has a different kind of egg.

**F is for flies that flit so fast.**

**G is for a grasshopper in grass so green.**

H is for a hornet that builds a paper home.

I is for an inchworm that looks like a twig.

J is for the June Bug, also called a May Beetle.

K is for Katydid. Their name comes from the kind of call they make.

L is for the lovely Luna Moth.

M is for mosquito. Its sting makes us itch.

N is for the Northern Crescent Butterfly.

O is for the oak that has acorns with holes. A weevil once lived inside. When it left it made a hole like the letter "o".

P is for the Potato Beetle, a pest on potato plants.

Q is for the Question Mark Butterfly. Find the question mark on its wings.

R is for the Red Admiral Butterfly

S is for the Six-spotted Green Tiger Beetle.

T is for Treehoppers, tiny insects that tap tree twigs and suck the sap.

U is for the Underwing Moth. Upper wings are gray. Underwings are colored.

V is for a Red Velvet Mite so very tiny and soft.

W is for the wasp with a waist so thin.

**X is for the Xerces Society that works to protect invertebrates and places where they live. People made this map to show where rare butterflies live.**

Y is for a yellow butterfly. This one is the yellow Sulfur butterfly.

Z is for Zebra caterpillars all squirming and striped. A moth laid the eggs that hatched into leaf-eating pests.

Benches A - Z

As you walk and sit on Benches A to Z,

What wildlife can you find or see?

Listen, look and smell.

What do you see and what can you tell?
